Traffic	Shell	Public	Unconfirmed	Location
Speed	0	0	0	
Noise	0	0	0	
Dust	0	0	0	
Other	0	0	0	

Emergency Response Exercise

On 16 April, Waterton Complex held a emergency response exercise that simulated a sour gas leak at a wellsite. The intent of the exercise was to test Waterton's ability to notify, mobilize, and respond to the simulated event. The exercise involved:

- over 50 personnel (participants and observers)
- three local residents
- five external agencies
 - Alberta Energy Regulator (AER)
 - RCMP
 - Pincher Creek Emergency Services
 - Pincher Creek Search and Rescue
 - Alberta Health Services

WAG AIR MONITORING TRAILER UPDATE

WATERTON COMMUNICATION STRATEGY

May 1, 2014

Emma Guppy
Shell Consultation Specialist

What we do now

- **WAG Meetings** – quarterly
- **New Development Committee Meetings**
- **Printed Newsletter** (Plant/ Community highlights) – annually
- **Open House** – annually (approx September)
- **1 on 1 engagement** - as agreed/ requested by stakeholders
- **Shell activity notification** (phone calls) – as needed/ requested by stakeholders

Proposed communication increase

- **Email activity notification to interested parties**
 - monthly or as needed
 - Updates on reclamation, drilling, traffic and plant activities

The screenshot shows an email client window with a 'Send' button, 'To...' and 'Cc...' fields, an 'Account' dropdown, and a 'Subject' field. The email content is as follows:

Send To... Cc... Account Subject: Sample email

Dear all:

It was another good week for our traffic co-ordination efforts at the plant. Construction of the road pull-outs at the Highway 6 intersection are now complete and our traffic monitoring trailer is installed and operational. Increased volumes of traffic will be associated with the Thio Cret construction project taking place at the plant. As this project is set to get underway May 12 and will continue throughout the summer months.

We kindly ask that everyone please follow the posted signage and slow down while traveling along the Shell MD road for your, and the construction crew's safety.

As we work to increase our communication base for these updates if you know of neighbours or friends who are interested in receiving these updates or if you would like to unsubscribe please get in touch in me through email rod.sinclair@shell.com or by phone at 403-627-7282.

As always, if you have any questions, please do not hesitate to contact me.

Thank you,
Rod Sinclair
Community Liaison Officer
