Judy Simpson

**ALTA GAS LTD.
APPLICATION NO. 1913609
STATEMENT OF CONCERN NO. 31336**

Dear Judy Simpson:

You are receiving this letter because you filed a statement of concern (SOC) about Application No.1913609. The Alberta Energy Regulator (AER) has reviewed your SOC, along with the application documentation.

In our review of your SOC the AER noted the following:

- Your lands are located about 0.70 km east of the proposed project and the landowner whose lands the project is on has signed the confirmation of non-objection.
- Regarding your concerns about noise, the AER is satisfied that these concerns are addressed by the requirements of *AER Directive 038: Noise Control*, with which AltaGas Ltd. must comply.
- Issues related to traffic volumes and dust are outside of the jurisdiction of the AER, and should be directed to the local municipality or Alberta Transport, as applicable.
- Your concerns about the decrease in value of your lands are compensation based and are outside the jurisdiction of the AER.
- The information provided by you about the visual impact is general in nature and does not address site specific issues.

When a decision is made on the Application you can find that decision at <https://aer.ca/search-pod>. Based on the considerations and reasons discussed above, the AER does not believe a hearing of the Application is necessary to render a decision. If a hearing on the Application is to be held for reasons other than the concerns you raise, a notice of hearing will be published.

You may file a regulatory appeal on the AER's decision on the Application, **once it is issued**, and only if you meet the criteria within section 36 of the *Responsible Energy Development Act* and section 3.1 of the *Responsible Energy Development Act General Regulation*. Filing instructions and forms are on our website under Regulatory Appeal Process.
